| Code | Details |
|---|---|
| 200 | **Response body**<br>{<br>"summary": "# Python Flask\n\nFlask is a lightweight, open-source Python web framework used for building web applications. It follows a micro-framework approach, providing essential tools for routing, templating, and request handling without imposing heavy dependencies or structural constraints. Flask is beginner-friendly, highly flexible, and allows developers to choose their own libraries for databases, authentication, and other features. It's commonly used for building REST APIs, single-page applications, and traditional server-rendered web applications. Flask emphasizes simplicity and extensibility, making it popular for both small projects and scalable applications when combined with appropriate extensions."<br>}<br>Download<br>**Response headers**<br>content-length: 723<br>content-type: application/json<br>date: Thu,12 Nov 2026 03:48:47 GMT<br>server: uvicorn |
